Assignment

Objective:

You have to demonstrate your front-end development skills by creating a responsive web page that replicates a provided design. You will achieve this using only HTML and CSS, without relying on external CSS libraries or frameworks.

Requirements:

- You will be provided with a design mockup (image or Figma file) for a specific webpage.

- Page design
- Page prototype

- Your code should be well-structured, maintainable, and use semantic HTML elements.
- The page should be fully responsive and display correctly across various screen sizes (desktop, tablet, mobile). You can utilise media queries to achieve responsiveness.
- The CSS code should be easy to understand and follow, with clear comments explaining the purpose of different styles.
